## **Aspect Automation Relocates to Shoreview, Minnesota**

**Shoreview, MN — December 16, 2018** — Aspect Automation, a leading provider of design and build services for custom automated manufacturing equipment, announced that it has moved into a new facility to accommodate growth.

The new facility is located at 5910 Rice Creek Parkway, Shoreview, Minnesota, near Interstate 35W and County Road J. All phone numbers remain the same.

“This move reflects our company’s commitment to providing quality services to our customers by increasing operational efficiencies within our engineering and manufacturing groups,” says Tim Boncher, President and CEO. “Our relocation marks a huge milestone for the company, its employees, and customers who will all benefit from the opportunities this move represents. Our new establishment offers open office workspace, creative areas for our engineering design teams, a variety of conference spaces, and amenities that encourage a collaborative atmosphere.”

Aspect serves a number of industries, including life sciences and healthcare, consumer and industrial products, and aerospace. The company specializes in full-service design and build of custom automated manufacturing equipment, as well as an array of development and support offerings, including proofs of principle, pilot lines, build to print packages, and unique equipment evaluation and optimization services.
